

Hidden Passages/Forgotten Space Concept Doors

Our 'Home Theater' Ticket Booth door displays the innovative and creative mind-set that we have at CBR.

The front of the door has 3-pieces of glass on the top half (Center glass is cut for the speak through and ticket slot) and 3- wood panels below.

The wall mounted Marquee above has a programmable LED, scrolling sign installed. The Interior of the door is lit with recessed lighting and has storage underneath the ticket slot shelf for electronics and CD/DVD's.

The interior is accessed through the full sized cabinet door at the back.
